

How the CBAA Schedulers & Dispatchers (S&D) Scholarship opens the door to a brighter future

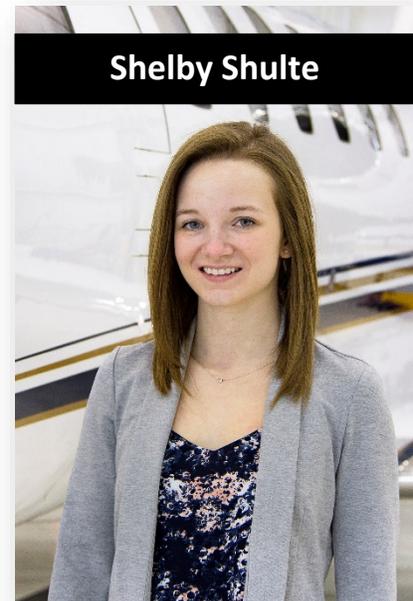

A letter from 2017 scholarship recipient, Shelby Schulte, Manager, Flight Coordination at AirSprint Inc.

I would like to thank the Canadian Business Aviation Association and their generous sponsors for offering this scholarship to individuals, such as myself, who are seeking opportunities to learn more about the aviation industry.

In September I received a certificate of completion of the BDA Aviation Flight Dispatcher Course. The material allowed me to learn about meteorology, air law, flight operations, and flight dispatcher procedures. I was able to apply the knowledge I gained to my job and have a better understanding of flight operations. This course has prepared me to write the Transport Canada Flight Dispatch exams.

McGill University offers a Mini-MBA series comprised of three programs. I have enrolled in the Executive Development Course in May-June of this year. This course focusses on strategy, human resource, marketing, and finance. I look forward to taking away business insight and management skills to expand my knowledge and further develop the role I am in today. Once I have received my certificate for the Executive Development Course, my goal is to work towards completing the entire Mini-MBA series.

This scholarship has opened doors to schedulers and dispatchers across Canada to further their education and careers in the industry. Thank you again to the Canadian Business Aviation Association and their committee for selecting me for the Schedulers and Dispatchers scholarship. I know the education I receive will allow me to have more opportunities in the future.

The CBAA S&D Scholarship provides an opportunity for current and prospective Canadian schedulers & dispatchers as well as aviation students interested in flight support careers (including air cadets), to receive a bursary up to \$10,000 towards continuing their education.
