INNOTECH-EXECAIRE AVIATION GROUP

MAKING A DIFFERENCE DURING COVID-19

In Late-March, three aircraft from the ExECAIRE and Image Air managed fleet flew to Ecuador to repatriate a group of 27 Canadians who got stranded when the South American country decided to close its borders.

Thousands of people travelling overseas were pushed to return home because of the Covid-19 outbreak. As of today, there are still many Canadians urged to return.

In response to this situation, they have launched a hotline to provide information about their aircraft and their availability for repatriation flights.

Soon after their arrival, Innotech-ExECAIRE were surprised by several notes of gratitude highlighting the exceptional service these families received from the team. They are extremely proud of their staff who worked tirelessly to safely bring them back home.
