

CBAA Risk Management System Now Online

Access the Canadian Business Aviation National Aggregate Database (NAD) and manage your flight department RMS records by registering for the CBAA's expanded Risk Management System (RMS) and National Aggregate Database (NAD) .

This program is a tool that will provide significant support to member operators in their safety compliance and planning. The CBAA is indebted to the program sponsors, Bombardier Business Aircraft and NAV CANADA and to our program partners OBDS and Aerofoil Consulting.

Available to members at no charge, the CBAA RMS allows you to log SMS reports, hazards and risks (safety profile), safety plans and results, review SMS results and contribute de-identified SMS data to the National Aggregate Database (NAD). The NAD aggregates this risk and safety data and provides users with the sector risk profile, common hazards, safety trends, safety lessons learned, best practices and mitigations which are shared with other which are shared with other RMS subscribers who have registered to use the NAD.

Confidentiality is assured. Information is only published once it has been validated by the operator and checked by the CBAA RMS gatekeeper. Records are de-identified and reported in aggregate only.

Contact Merlin Preuss, mpreuss@cbaa.ca or
Lindsay Berndt, lberndt@cbaa.ca for information

GENERAL INFORMATION

The CBAA RMS allows you to:

- a. Document SMS compliance, QA results (assuming all audit findings are entered as SMS reports), and review SMS results;
- b. Add reports simply and quickly to the NAD, by entering only the minimum required information into an SMS report, **even if you do not use the CBAA RMS** to meet documentation requirements; Upload batch SMS reports to the NAD via your account
- c. Quickly access the NAD and other services through a specially designed dashboard
- d. Automatically update any changes to NAD information from any SMS report once the report has been validated by the operator and published by the NAD gatekeeper; and
- e. Do your own analysis of the NAD for trends, successful mitigations and corrective actions, and sector safety performance.

The CBAA sample manuals:

- a. Are a joint development of Aerofoil Consulting and the CBAA;
- b. Are available free of charge to members who register for the CBAA RMS;
- c. Come in two versions, one for a “no employees” operation and one for “with employees” operations and address both PPC and TTPP competency certification programs;
- d. Have been submitted to TC for review; the risk of error or omissions in these manuals is low; and
- e. Incorporate the CBAA RMS as the means of documenting compliance with the CAR 604 SMS, QA and Review of the SMS requirements.

Administration information for the CBAA RMS and the sample manuals:

- a. To register, (if you are **not already** registered in the Baldwin NAD), go to <https://nad.obds.com/framework/>, click on Login, then click on Register and Account, provide the information requested and send the email.
- b. Direct any questions or comments on the CBAA RMS to mpreuss@cbaa.ca and lberndt@cbaa.ca;
- c. Direct any questions or comments on the sample manual(s) to Ed Ratzlaff Ed@aerofoil.ca **except for questions or comments on the Risk Management chapter** in which case direct these questions to mpreuss@cbaa.ca.
